

PABLO SEBASTIAN URIARTE BETANCOURT

Software Engineer | Web Development and Automation

667 197 9283 | Pablouriarte1@outlook.es | [LinkedIn](#) | [GitHub](#) | [Portafolio](#)

PROFILE

Software Engineer graduate from Universidad Autónoma de Occidente. I build web solutions and Python automations that reduce manual work, organize information, and support internal operations. Experience with data validation, technical support, and administrative processes.

SELECTED PROJECTS

AARC ERP | Public demo

Next.js, Drizzle ORM, MySQL, Better Auth

[Live demo: aarc-erp-demo.vercel.app](#)

- Built an isolated, read-only demo of a modular ERP for human-resources and administrative workflows, using fictional data with no production connection.
- The demo includes 6 fictional employee records, role-based access, and navigable employee, credential, vacation, catalog, and export modules.

LimitLoot | Full-stack e-commerce

Next.js, React, TypeScript, Prisma, PostgreSQL

[Live demo: shop-umber-theta.vercel.app](#)

- Built an e-commerce platform with 12 demo products, a filterable catalog, search, persistent cart, and simulated checkout.
- Implemented a demo mode that blocks real payments, emails, webhooks, and fulfillment orders; 44 automated tests cover critical paths.

PROFESSIONAL EXPERIENCE

Data Entry Specialist | SEGALMEX (Seguridad Alimentaria Mexicana)

May 2023 - December 2024

- Captured and validated personal data, land records, and grain-producer contracts, including billing amounts for services provided by storage facilities.
- Automated data capture, web scraping, bulk file editing, and Word and Excel report generation with Python scripts.

Intern | AARC del Río Culiacán

May 2022 - May 2023

- Supported record review, producer communication, and payment-complement preparation; also wrote institutional WordPress articles.
- Provided computer support, software installation, and backups. Created Python scripts and Excel automations for tax certificates and bulk-account upload files.

EDUCATION

Bachelor's Degree in Software Engineering | Universidad Autónoma de Occidente

Completed July 2026

TECHNOLOGIES AND SKILLS

Development: Python, C++, Next.js, React, TypeScript, web development, process automation. Tools: Git, GitHub, Vercel, MySQL, PostgreSQL, Excel, Word, PowerPoint, WordPress. Testing: Vitest. Strengths: analysis, problem solving, customer service, and teamwork.
